

Sensors & software for improving safety, reducing costs & increasing profitability

Proactive solution to detect hazards, prevent risks and maximize reputation

Key benefits

- ✓ Prevent hazards (smoke, COVID-19)
- ✓ Up to 60% cost energy savings
- ✓ Reputation & safe operations
- ✓ Low cost, easy to implement
- ✓ Works with any type of building
- ✓ CSR reporting, subsidies

Outcomes

Air pollution & fire hazard prevention

Precise diagnostics of hazard presence, location, amount & specific source

Energy & operational cost savings

Diagnose & prevent HVAC failure before it happens
Maximize the use of operational resources

Increased revenue

Measure & showcase space cleanliness & identify specific spaces & rooms than need maintenance

Sensors & software for improving safety, reducing costs & increasing profitability

Proactive solution to detect hazards, prevent risks and maximize reputation

ROI

Reduced HVAC maintenance costs

30% savings from reduced costs & reputation risks

Energy savings

40% of energy cost savings

Increased profitability

15% increase in revenue

Applications

Rooms

Fitness & Spa

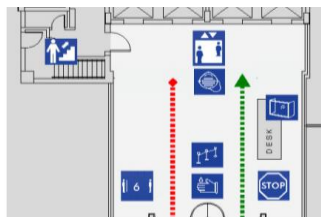

Dining & events

Parking

Lobbies & elevators

Restrooms

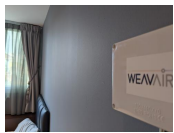

Sensors & software for improving safety, reducing costs & increasing profitability

Proactive solution to detect hazards, prevent risks and maximize reputation

How it works

1. Install

Any space
Setup time < 10min

2. Connect

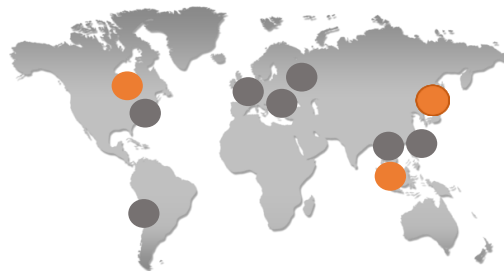

Secure communication
Real-time data

3. Integrate

Fast decisions
Autonomous systems

Trusted by customers & partners worldwide
