

PPPHealth4All

Platform for People-centered Partnerships

Effective Cross-Sector Collaboration
Breaking Silos and Enhancing Knowledge Exchange

Trustworthy - Inclusive - Sustainable - Decentralised

Who We Are?

SDG.17 Consulting GmbH

We operate at the crossroads between various sectors to promote SDG Agenda and, in particular, SDG.3.

We design new sustainable delivery models for public-private partnerships in the healthcare sector. We work to embed social impact in every business making and advocate policies and practices that encourage the development of low-carbon, climate-resilient infrastructure delivered through sustainable and people-first public-private partnerships.

SDG.17 Consulting GmbH

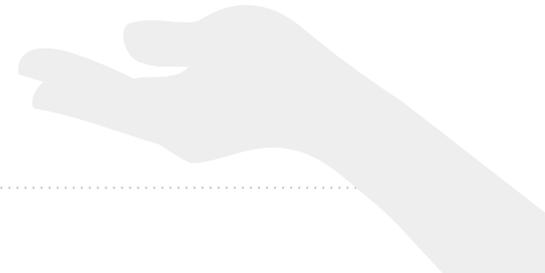

SDG.17 Consulting GmbH is a member of German Health Alliance, Global Health Hub Germany, German PPP Association (BPPP e.V.), UN Women National Committee Germany e.V., German Federal Association for Sustainability, Society for International Development (Frankfurt Chapter) and Informal Interagency Task Team of the United Nations on Sustainable Sourcing in the Health Sector (SPHS).

We inspire for sustainability

Eng. Natalia Korchakova-Heeb is an internationally recognised expert in sustainable infrastructure, public procurement, public-private partnerships and international technical assistance with experience in the public, private and non-governmental sectors.

- PPP-Speaker for the German Health Alliance
- Coordinator of working groups on partnership and on digital solutions for global health within the Global Health Hub Germany.
- Member of the Strategic Committee of the World Association of PPP Units an PPP professionals and is the member of the UNECE PPP Working Party.
- Twice fellow of the International Policy Fellowship (Hungary), a fellow of the Freedom Support Act Fellowship in Contemporary Issues (USA).

PPPHealth4All is a Winner

Global Health Hub Germany Competition
„New Ideas for Global Health“

13 January 2020, Berlin, Germany

UN Sustainable Development Goal.3 To Be Achieved by 2030

400 million people

have no access to basic healthcare

31-year gap

between the countries with the shortest and longest life expectancies.

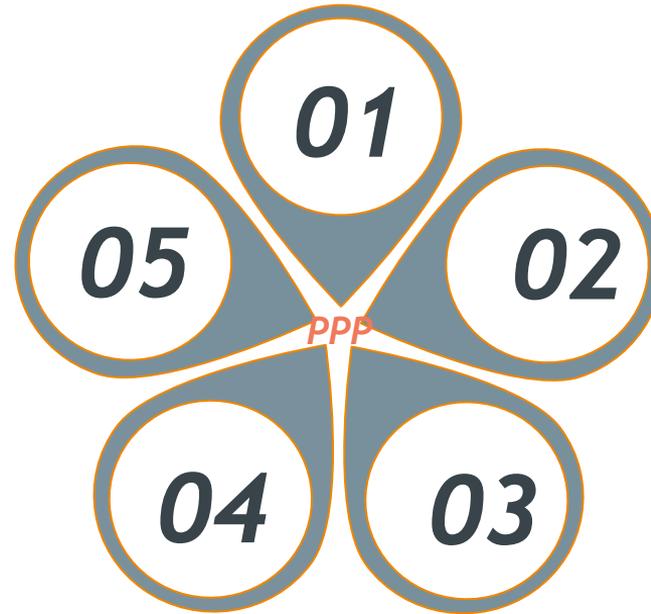

5 million people

die every year because of poor-quality health care in low- and middle-income countries

PPPs could help but *Strong Critique Prevents Its Wider Use*

Lack of transparency in PPP deals,
conflicts of interest, corruption

Distrust of the ‘fat cat’
advisors/consultants at the
expense of the consumer

Negative marketing for PPPs:
Governments losing political
will to promote PPPs. PPPs are
subject of politically motivated
media coverage

Various silos and lack of
communicaitons
between stakeholders and
end users

PPPs are expected to deliver
value for money, but not necessary
value for people
Lack of understanding what
sustainability means in practical terms

PPPs could help but *Strong Critique Prevents Its Wider Use*

The problem with Public-Private Partnerships and the role of the EU

Written by Enrique Guerrero Salom MEP on 3 December 2018 in Opinion

Public-Private Partnerships are a deeply worrying trend and carry far more risk for the state than for the private companies involved, writes Enrique Guerrero Salom.

Table 3. Myths about PPPs

Does the PPP reduce public spending, government subsidies, or user charges?	No. The public authority, or users, have to pay for the cost of building and the service whether it is done through a PPP or through the conventional option.
Does a PPP mean that the private company pays for the cost of building?	No. The cost of constructing the building has to be paid for out of public spending or user charges. The private company just borrows money – but the public have to repay that loan, with interest.
Does a PPP reduce the cost of running the service?	No. The cost of running the service is paid for out of public spending or user charges. And empirical evidence shows that private companies are usually no more efficient than the public sector – and a PPP usually costs more to set up and manage.
Does it allow the government to spend more money on other services?	No. The public authority has to spend at least as much on the PPP as it would on the conventional option – so it may even have to cut other services.
Does the PPP reduce borrowing?	No. The same amount of money has to be borrowed to pay for the construction of the building- or even more, because PPP construction costs are usually higher..
Does the PPP reduce government borrowing?	Yes –if statisticians agree that it can be treated as 'off-balance sheet'. But there is increasing uncertainty about whether PPPs can be treated as truly private borrowing.

PPPs come with a high cost for the public purse, an excessive level of risk for the public sector and, therefore, a heavy burden for citizens"

Our Solution

Transition to

A form of long-term contract, where a public entity transfers the provision of public health services to a private party. The long-term nature of the partnership creates an opportunity for both the public and private partners to maximise each other's strengths.

People-Centered and Sustainable PPPs

A form of long-term contract, where a public party delegate to a private party, provision of public health services **to be delivered in line with Sustainable Development Goals. The projects are people-centric and carbon-neutral.** The long-term nature of the partnership creates an opportunity for both the public and private partners to take advantage of each other's strengths and to deliver services to citizens **in sustainable manner.**

Why We Are Doing It?

- The healthcare expenditure has been rising across the world, but lack of public health infrastructure will result in a hurdle to realize the third goal of the Sustainable Development Goals (SDGs) by 2030
- Governments have been looking for alternatives to close the financing gap and Public-Private Partnerships (PPPs) came up as viable solution
- However, there are challenges related to the execution of the PPP projects that are being undertaken in the healthcare ecosystem
- To fulfill this gap, SDG.17 Consulting GmbH has come up with an innovative knowledge base platform PPPHealth4All to eliminate weak points in PPP healthcare approaches and to develop PPP healthcare ecosystem
- The platform, built on blockchain, aims to build trust among the stakeholders of PPP healthcare ecosystem and offers sustainable solutions
- Not only it will help implementation of PPP projects fairly and transparently, and will also reduce the preparation, transaction and operational costs

~ €7 trillion
Global Spending on Health in 2017

3.9%
Spending grew from 2000 to 2017 per year

Sources: United Nations, SDG.17Consulting GmbH, EU

1 749 PPPs
In EU until 2016

~ € 336 billion
Reached financial close in the EU (2016)

What is PPPHealth4All?

360 perspective for a PPP health ecosystem - breaking silos and connecting the dots

- is a knowledge platform that connects stakeholders in the PPPs healthcare ecosystem.
- objective is to develop a seamless approach for preparation and implementation of people - centered PPP projects that are in line with the SDGs and enabling PPP projects and business models that provide clear societal, environmental and economic benefits.
- provides historical data and Informed decision-making, quality and timely data, that is vital for enabling governments, international organisations, civil society, private sector and the general public to make informed decisions and to ensure the accountability of representative bodies.
- is a globally implemented blockchain-based solution, which will be operating as a not-for-profit, with aim to minimize PPP projects transaction costs and to break information silos. We bring blockchain technology to “end user”.

PPPHealth4All

Why in the State of Hesse?

The State of Hessen is keen on digitalization and innovations and recognises digitalisation as a challenge and as an opportunity. The Digital Hessen Strategy demonstrates the potentials of digitalisation for enhancing the quality of life and furthering the sustainable development of the State of Hesse. Digitalisation is not an end in itself - it must be to the advantage of society.

- Frankfurt-am-Main is a mobility hub which is easily accessible both nationally and throughout Europe with excellent traffic infrastructure via roads and airport.
- Frankfurt-am-Main is alpha city and the financial and banking center of Germany, and key stakeholders are located here (e.g. DZ Bank, KfW-IPEX Bank, Commerzbank, Commerzbank, DIF, KfW Development Bank, GLZ).
- The Hessian health industry is a dynamically growing industry. Gross value added grew by over 29% between 2008 and 2016. In 2016, this sector comprised of 446,000 workers and generated 26 billion EUR.
- Hesse is the center of the German health industry (FiZ, “Initiative Gesundheitsindustrie Hessen”, Competence Center for telemedicine and e-health, big companies, such as Fresenius, B. Braun Melsinger, Merck, etc.)

Vision and Mission Statements

VISION

To achieve Sustainable Development Goal.3 by 2030 through facilitation of people-centered public private partnerships projects

MISSION

To empower countries to improve their health services and healthcare infrastructure by providing an access to international experience, expertise and resources through on-line blockchain-enabled knowledge platform PPPHealth4All in order to facilitate development of a low-carbon, people-centered PPPs in the healthcare sector

Policy Context: *UN Sustainable Agenda 2030*

The United Nations Sustainable Development Goals number 3. Good Health and Well-being has been given a high priority. Achieving this goal comes with a huge price tag and commitment. We need to achieve SDG.3 by 2030!

3 GOOD HEALTH
AND WELL-BEING

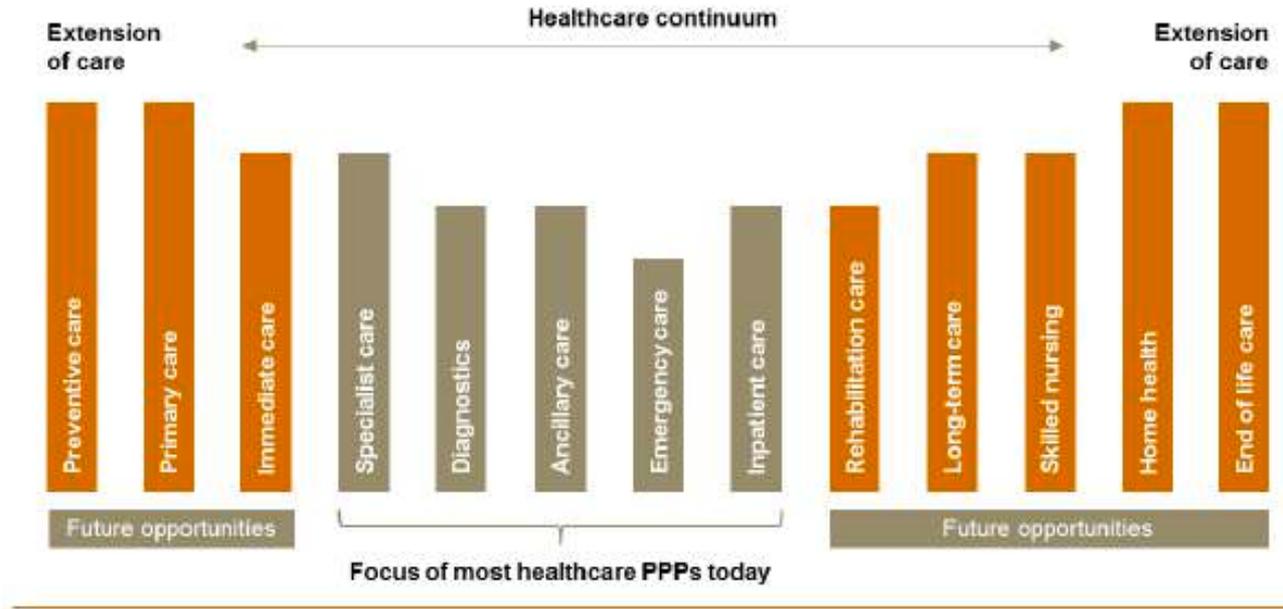

17 PARTNERSHIPS
FOR THE GOALS

But how? The public-private partnerships could serve a vital role in bringing together resources, expertise, innovations and commitment of public and non-public actors.

Who Will Benefit *From The PPPHealth4All?*

Citizens/NGOs

- Improved healthcare services and solutions
- Improved access to information
- Participation in decision -making

National and local governments

- Navigation tools through set of recommendations, policy guidelines, standards to design and implement sustainable PPPs
- Peer-to-peer programme
- Tailor-made training
- Access to best practices
- Access to sustainable finance
- Improved dialogue with stakeholders

Private Partners & Investors

- Improved sustainability practices and positive marketing
- Increased pipeline of sustainable PPP projects
- New benchmarks of PPP health projects in line with SDGs and People-first approach
- Tender search
- Ideas for new partnerships
- Partners search
- Improved dialogue with stakeholders

Experts

- Body of knowledge related to sustainable partnerships in the health sector
- Database of experts
- Specialised training on new tools and methodologies
- Increased pipeline of PPP projects/tender search

Academia

- Data for research
- Partners for research
- Requests for research
- Research partnerships and joint publications
- Improved knowledge of PPPs in the healthcare sector

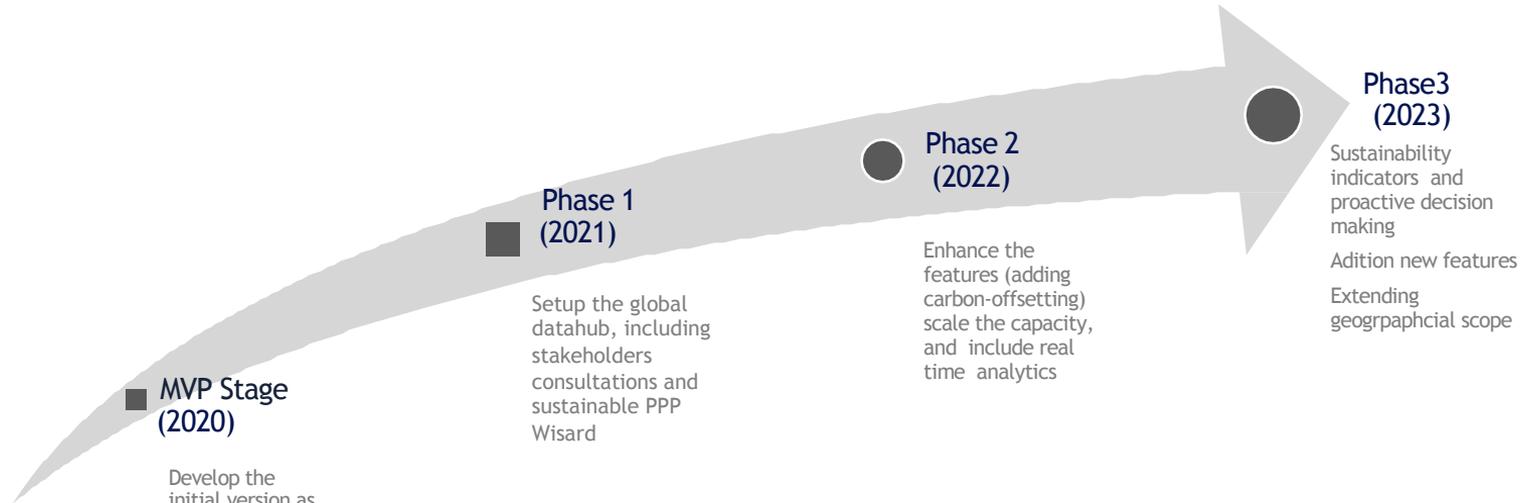

PPPHealth4All - a technology with societal value

- Trust: users control their data
- Decentralisation: Secure peer-to-peer transactions
- Inclusion: All take part in online society
- Sustainability: Reduced carbon footprint
- Resilience: secure and resilient infrastructure

PPPHealth4All Roadmap

Proposed Technology

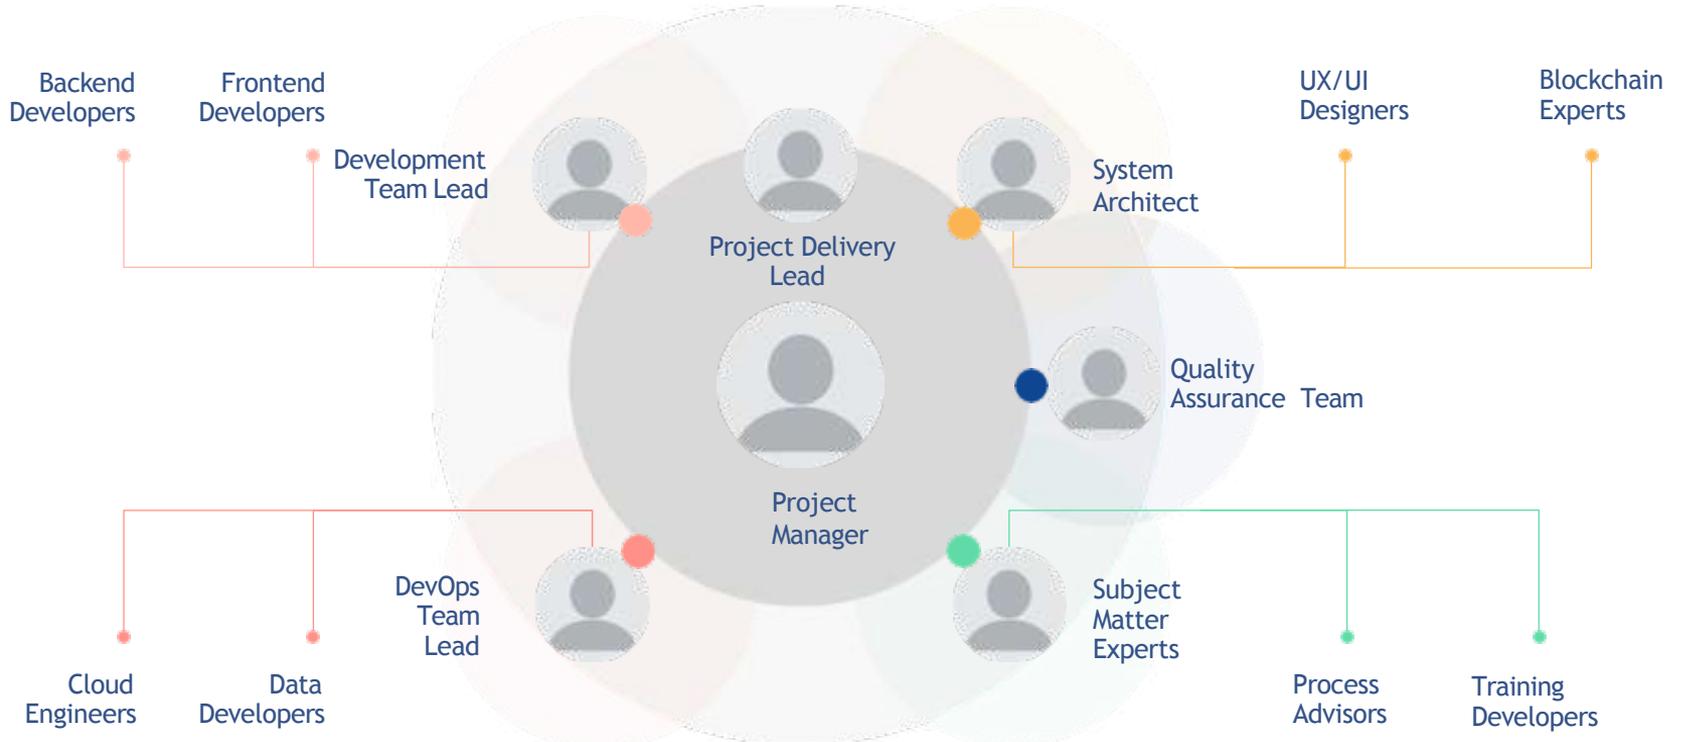

HYPERLEDGER
FABRIC

Tech-Based Consortium: These are defined by organizations that have a need for transacting business with one another and they must agree to the policies that govern the network. Fabric architecture enables easy onboarding of various organizations into the Fabric blockchain network.

- Governance: Provide neutral, open & community-driven infrastructures. Supported by technical and business governance.
- Performance & Scalability: Transaction processing in 3 phases (endorsement, ordering, and commitment). This separation confers several advantages such as fewer levels of trust and verification are required across node types, and network scalability and performance are optimized.
- Security: Permissioned network with strong Identity Management. Anonymous client authentication with Identity Mixer.
- Privacy: Supports network where privacy is a key operational requirement using channels. Privacy between organizations within a channel is achieved using private data collections

Our Project Organisation

Technical Team

Task	Role
Requirement / Planning	Business Analyst
User Experience (UX/UI)	UX Designer
Application Design	UI Designer
Software Architecture	System Achitect
Frontend Development	Frontend Engineers (2)
Backend Development	Backend Engineers (2)
Database systems	Data Engineer
Blockchain Development	Blockchain Experts (2)
Cloud Hosting	DevOps Engineer
Testing & Quality Assurance	QA Test Engineer
Support Material	Training Developer
Project Management	Project Manager

Success Criteria

Quantative

- Number of people-centered PPPs projects initiated through PPPHealth4All
- Increase in number of PPP projects globally
- Carbon footprint of PPP project registered at PPPHealth4All
- Co2 off-set of PPP projects, (t)
- Number of active users and members achieved
- Number of licences purchased
- Number of match-making agreements
- Volume of sustainable financing attracted
- Number of blockchain transactions

Qualitative

- Progress on SDG.3, SDG.17 and other relevant SDGs
- Improved communications between various groups of stakeholders
- Improved public image of PPP modality
- Improved dialogue between stakeholders
- Improved transparency and decisio-making
- Secure, privacy-aware, GDPR compliant data access, sharing and aggregation
- Solutions are offered to leverage patient-generated health data in a decentralized way for either research or commercial purposes

Our Scalability

-  Administrative scalability: the ability for an increasing number of organizations or users to access PPPHealth4All through purchase of licenses
-  Functional scalability: the ability to enhance the system by adding new functionalities (e.g PPP Contract Management)
-  Geographic scalability: the scope could be enlarged from the pilot countries to global
-  Extension from health sector to social infrastructure (schools, kindergartens)

Expected Impact

-  Improved individual and community self-reliance and participation in the planning, organization, operation and control of health care in concert with public and private providers of health services.
-  Boosted digital health sovereignty and created, leveraged knowledge, values, new technological opportunities and interconnection and pioneering decentralised solutions to global and/or local sustainability challenges
-  Healthcare is carbon free, the negative impact to environment is minimised

Adherence to the *Principles of Digital Development*

Principles of Digital Development designed by UNICEF and endorsed by a large number of organisations, including SDG.17 Consulting GmbH

Design With the User User-orientated design

Design With the User Consider the structures and needs in each country, region and community.

Design for Scale Securing funding or partners that take the initiative to new communities or regions.

Build for Sustainability Building sustainable programs, platforms and digital tools to maximize long-term impact.

Be Data Driven information is available to the people when they need it, and they are using those data to take action.

Use Open Standards, Open Data,

Open Source, and Open Innovation An open approach to digital development can help to increase collaboration in the digital development community

Reuse and Improve Taking the work further than any organization or program can do alone.

Address Privacy & Security Careful consideration of which data are collected

Be Collaborative Sharing information, insights, strategies and resources across projects, organizations and sectors

Why to support PPPHealth4All?

More people-centered PPPs = Achievement of SDG.3 by 2030

Reduced PPP
Project
Preparation,
Transaction and
Operational
Costs

Transparency,
Immunity and
Trust of
Blockchain
technologies

Open Knowledge,
Open Source and
Open Science
concepts

Increased value of
PPP healthcare
ecosystem-
improved dialogue

Integrating End Users
into PPP value chain
and decision-making;
Increased Impact

Value for Money + Value for People = Impact

*“There's always an opportunity
to make a difference...”*
